

Sensors+

Value Beyond Sensing

At SICK, we don't want to just create the world's best sensors; we want to offer value throughout our customers' organizations. One way we do this is through our custom products program – Sensors+. The possibilities are endless, but see below for our key custom offerings that can help your organization save time and money and boost MRO business.

Kitting/Pre-assembly

Save time by simplifying inventory, purchasing, and assembly by kitting the sensor, bracket, cable, and reflector into a pre-assembled, single part number solution.

Custom Mounting

Custom designed mounting brackets to meet your machine's unique mounting needs.

Pre-taught Sensors

Streamline installation with sensors factory taught to application specifications.

Co-labeling

Maximize MRO and brand awareness by putting your company logo and contact information on the sensor combined with an exclusive part number, orderable only by you.

Custom Cabling

Customized sensor cabling such as custom lengths and special connectors to meet your machine's unique connectivity needs.

Much of the SICK sensor portfolio is customizable, but below are some of the most often customized products. To learn more, reach out to your SICK sales representative to discuss how the Sensors+ program can add value to your operations!
